DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Kelly in view of Thornton, Meythaler et al., Stone, and in further view of Binard, et al.** The Kelly patent does not disclose the use of filters at the distal and proximal ends. However, the Thornton patent demonstrates that it is conventional to design catheters having hydrophobic tips; furthermore, in relation to the use of filters in combination with infusion ports, Meythaler et al., demonstrates that such use is conventional in the art. Additionally, Stone demonstrates that the use of hydrophobic and charcoal filters in combination with filters is well known in the art. Finally, concerning the amended language in claims 1 and 7, in figure 7, Binard, et al., demonstrates the conventionality of severing the proximal section of a catheter shaft when the inflation lumen becomes obstructed.

Based on the above observations, for a person of ordinary skill in the art, the modification of the Kelly catheter with hydrophobic or charcoal filters positioned at the proximal or distal ends of said catheter and the step of severing the proximal end to deflate the balloon would have been considered obvious in view of the conventionality of these enhancements.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

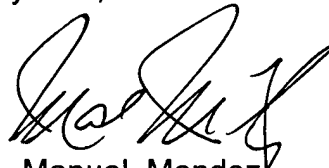

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
